Letterhead Certificate for the Export of Poultry and Poultry Products to Dominica

Date Issued: _____ Certificate Number: _____

1. Fresh poultry meat derives from birds originating in the United States or Canada or was imported in accordance with conditions meeting recommendations of the OIE for listed diseases affecting poultry transmissible through the product.
2. In compliance with the United States' National Residue Program, the meat does not contain residues of antibiotics or their metabolites in quantities exceeding U.S. established tolerance levels. Growth-promoting hormones are not approved for use in poultry in the United States.
3. The birds giving origin to the product to be shipped to the Commonwealth of Dominica were under State supervision for the diseases regulated by the State and/or the United States Department of Agriculture and presented no evidence of avian influenza. Alternatively, the meat product was legally imported into the U.S.
4. The United States or State of origin has been free of both highly pathogenic avian influenza and velogenic Newcastle disease for at least 90 days. Farms of origin are free of notifiable avian influenza. The slaughter plants and flocks of origin of chicken and turkey meat are approved for export based on compliance with the standards of U.S. H5/H7 Avian Influenza Monitored. Alternatively, the meat product was legally imported into the U.S.
